

## Questionnaire - Mini-Usability Test – LSC255/LSC555

Dear volunteer,

Thank you for agreeing to participate in this usability test session for our class. Your feedback is anonymous. If you have any questions about this session, please contact Dr. Sang Hoo Oh at [ohs@cua.edu](mailto:ohs@cua.edu).

1. The name of the LSC255/LSC555 student conducting the test: Claire Joseph

2. Please indicate your level of agreement with the following statements.

	Strongly disagree	Disagree	Neither disagree nor agree	Agree	Strongly agree
The way information was presented is consistent within the system and with other web sites.				X	
The system prevented me from making mistakes and helped me easily recover from mistakes.		X			
The system provided informative feedback to help ensure that I understood what just happened.			X		
The system was efficient for me to use.		X			
The system provides attractive content that immediately invited me to use and explore the archive.					X
I was able to quickly learn how the system works and start using it.				X	
I quickly found interesting material by using the system.		X			
The system was engaging and enjoyable to use.		X			

3. Please comment on something you liked about the system.

I liked how easy it was to casually explore or browse the Tower archives. I've used JSTOR before so it was intuitive for me to use.

4. Please comment on something you didn't like about the system.

The search function did not really work well. I could not figure out how results were evaluated for relevancy in relation to my search terms. It seems like older issues would very rarely show up in search results which made searching through them very difficult and time consuming.

5. Please use this space for any additional comments about the system.

In general, the system is usable but there are a lot of kinks in the searchability that need to be worked out, especially if used for specific research.
